

Glass Systems B130 Rectangular Stair Anchor

Product Features

- An architecturally styled option for fixing a glass balustrade to stairs, providing the strength of double fixing with the simplicity of a single cover plate.
- Concealed fixing for a sleek finish.
- Able to be combined with a timber cover to integrate with timber stair treads.
- A less 'busy' alternative to using two round or square cover plates per stair.
- Can be used with or without a stainless steel Spacer between the glass panel and stairs.
- Cover Plates and Spacers manufactured from 316 Stainless Steel for long life, strength and serviceability and available in Polished Stainless or Satin Stainless finishes.
- Can be combined with our Handrail Systems. Either a top rail or a side-mounted handrail fixed to the glass by stainless handrail brackets.
