

Product Features

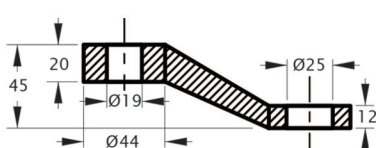

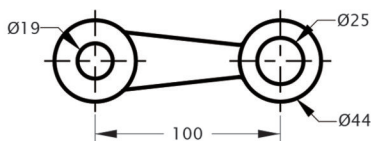

- . A wide range of products is available to compliment most canopy and spider fitting projects such as the Karangahape bus terminals and windbreaks pictured.
- . Fixing detail can be tailored for individual projects including side fixed, bottom fixed or top mounted fitting to meet the requirements of small canopies through to complex glass walls.
- . Manufactured from 316 stainless to maximise the products life and appearance and available in polished or satin finishes.
- . Swivels are available for toughened, laminated, or double glazed units including flush fitting and surface mounted fixing options.
- . Custom design and fabrication services are available for specific projects.
